I know. Jason Magalen from SEA Engineering also needs to make his travel arrangements. Tierra will send a RTC today, and if we (EPA) are OK they can revise the QAPP to be approved and the plan is to mob on Dec 3.

As for oversight, Tierra has to get back to me today on whether there's room on the surveying boat for an additional observer. If not, I will let you know whether we will need an additional boat. I should be able to get back to you later today

EPA is planning to do oversight when OSI performs:

- 1) Test and/or verifies their land-side control point(s)
- 2) Sets and verifies the position of their tide gauge
- 3) Completes the initial equipment calibration (patch test) for the multi-beam/single-beam sonars
- 4) Completes their performance testing of the multi-beam

Eugenia:

Need to know your plan.

Rob:

Please let us know if you want Bill to provide oversight of this work.

With the work starting next week, we would like him to book his travel. Do you know the start date?

Also, do you want us to perform this work on the 2012 Bathy task, or should we open a new task and track this work separately?

Doug

Doug:

Region 2 has invited the CPG to provide oversight of the survey starting the week of Dec 3; Jason from SEA is not available for the survey - is Bill available?

Have a good Thanksgiving....
